

Feel the  Rhythm

beat  
cycling.

**Beat Cycling** represents the next step in indoor cycling. Over a decade of experience and dedication to indoor cycling has allowed us to offer what is simply a better bike. Our team has concentrated on durability, safety, comfort, ease of use and high performance to design a high quality bike which fulfils the needs of riders in fitness studios and health clubs, providing the most exciting and dynamic cycling experience available. So it is no surprise that Beat Cycling is rapidly becoming a brand of reference internationally.

**Beat Cycling Academy**, under the leadership of Gaspar Vera and his team of experienced Master Trainers, offers a complete program of indoor cycling education. The program includes initiation courses, instructor certification and a variety of continuing education courses, all following a methodology with a solid base in sports sciences and years of experience.

**BEAT CYCLING ESSENTIAL** is an introduction into the world of indoor cycling, which serves as an initiation to the activity for beginners and covers basic points such as positions, adjustments and musical rhythm.

The **BEAT CYCLING INSTRUCTOR** certification course, open to anyone with basic notions of indoor cycling and experience riding, is an intensive program with a complete course content lasting 2 days, with both theoretical and practical sessions. We cover all the principal areas of indoor cycling, from specific topics such as fisiology and biomechanics to new topics such as the latest tendencies in motivation techniques.

The **BEAT CYCLING ADVANCE** continuing education courses allow instructors to deepen their knowledge in areas such as: "Beat Cycling for Everyone: cardio-respiratory and metabolic alterations", "Treatment and interpretation of music in Beat Cycling", "Beat Cycling and the other side of indoor cycling", or "Assertive Communication in Beat Cycling: the key to success"

We offer an education program of maximum quality and a new way to see and experience indoor cycling. Our team of Master Trainers and a program up-to-date and adapted to the real needs of health clubs and fitness centers, is the best guarantee to choose Beat Cycling as the program for your center.

In our web page you will find all the information necessary to join in this exciting new project and become part of the Beat Cycling team.
